

Intro Psych

Mr. McMurray

Unit 2: Neuroscience

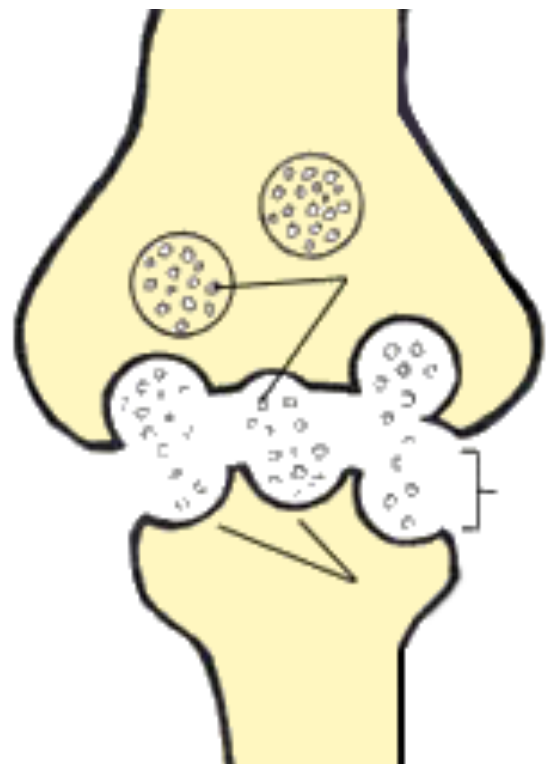

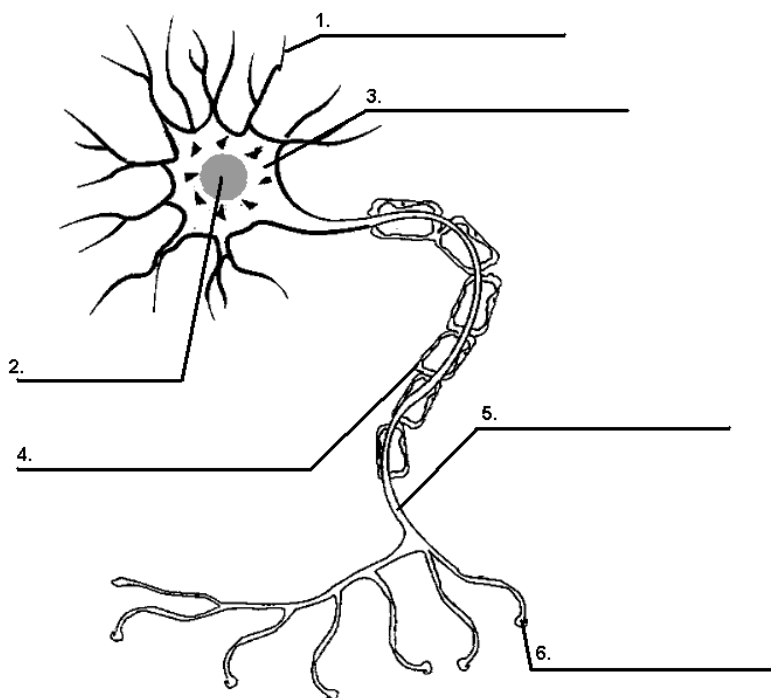

Objectives Study Guide

Directions: Write out responses or explanations to meet the following objectives. If you turn this in on the day of your test you will get 3 points extra credit☺

I can...

Objective 1: Describe (in writing below) and diagram the process of neurotransmission and explain how the various parts of a neuron facilitate the process.

Diagram Below

Objective 2: Provide an example of neurotransmission from the point of sensory input to motor output.

Objective 3: Describe how drugs impact the synapse and neurotransmission process. Provide an example.

Objective 4: Identify the major parts of the brain, where they are located, and generally what they do. (Best to review notecards for this)

Diagram below.
